Dear colleagues,

the Scaphoid is still a challenging argument in wrist surgery. The multitude of the different solutions show that not all problems are solved. Some arguments have clear solutions, other problems have still concurrent techniques . We will discuss these aspects and see the different techniques in live operations.

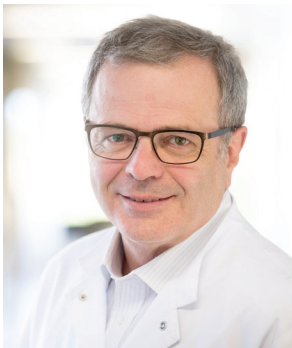

For selected participants we will continue with our double workshop on cadavers at the IRCAD in Strasbourg. The first 40 registered participants will be admitted. The course will deal with either open or arthroscopic surgery. Official language will be English.

We hope to see you in Markgröningen for what is sure to be an exciting and productive symposium.

Best regards,

Prof. Max Haerle
